HYGIENE & HAND PROTECTION EXPERTS

OUR WELL-KNOWN BRANDS

THE STRENGTH OF THE EXPERIENCE

Spontex Professional's expertise covers not only the production of cellulose sponge products, but also the manufacture of wiping products, abrasives and nonwoven textiles. In order to meet the needs of professionals we have developed a range of technical products which deliver increased efficiency and productivity, storage issue solutions and ergonomic cleaning.

1 EXPERTS FOR MORE THAN **85** years

1932 Creation of the pilot plant in Beauvais, France.
1937 launch of industrial-scale manufacturing of vegetable cellulosic sponges.

2 AN INTERNATIONAL OUTREACH

Spontex Professional is present in more than 85 countries, we have four production factories in Europe.

3 EXTENSIVE KNOWLEDGE OF PROFESSIONAL CLEANING PROCEDURES

In 1987 the Professional arm of Spontex was created. Our purpose is to deliver solutions for the needs of cleaning in business.

DID YOU KNOW?

Our Spontex and Azella sponges are manufactured in our factories in France.

CERTIFICATIONS OF OUR FACTORIES

PROTECTIVE GLOVES MARKET LEADER

Mapa Professional is committed to offering companies **innovative solutions** for protecting the hands which meet users needs.

We centre our brand around the **health and safety** of users at their workplace. Our offer meets requirements for **comfort** and **protection** for risks in the professional environment.

HAND PROTECTION BEYOND THE GLOVE

We have a team dedicated to understanding the needs of our users. Designing solutions for applications for a wide variety of industries.

1 Customer Engineering Departments
stc.mapaspontex@newellco.com

2 R&D Centres
(60 engineers and technicians)

In-house production
(3 factories worldwide)

1 Application laboratory
Exclusive testing at our in-house laboratory, where we go above and beyond standard regulatory testing to reproduce real life, in-house working conditions. Focusing on grip, durability, dexterity, thermal and breathability.

SCOURING Sponges

100% RECYCLED FIBRE
0% ADDED COLOURANT

► Sponrex

SCOURING SPONGE MADE UP OF AN ABRASIVE CLOTH LAMINATED ON A CELLULOSIC SPONGE

A product adapted to the diversity of needs: several sizes, different degrees of abrasiveness. Biodegradable sponge part.

- +** • **Bi-functional products (time-saving) washing and scouring**
- **Excellent absorption capacity: 20 times its dry weight**
- **Easy to rinse and clean**

SPONREX 100

► Code : **95000116**
Gencod UC 3384129501165

Rectangular recycled scourer
Dimensions : 128 x 84 x 26 mm
Colour : white/brown
Packaging : 10 pieces per bag
6 bags per carton

TYPE OF PRODUCT

Cellulose scouring sponge

COMPOSITION

Sponge part: Pigment*, plasticiser, water, cellulose
Abrasive part: Latex, glue, synthetic fibres, abrasive charges

INSTRUCTIONS FOR USE

Rinse the sponge before its first use to eliminate the plasticiser. Rinse and wring out after use.

CROSS CONTAMINATION & COLOUR-CODED SYSTEM

⊕ WHAT IS CROSS CONTAMINATION?

It is the act of moving bacteria or soils to areas that could be exposed to humans.
It could potentially harm the individuals involved in these areas.

In order to answer customers needs and continue implementing best practices, Mapa Spontex Professional is offering colour-coded cleaning tools.

Colour-coded cleaning tools help to increase operator productivity and deliver comfort, whilst avoiding cross contaminating areas and limiting the spread of germs and bacteria between areas. This also quickly and easily ensures that the right cleaning tool is used in the right environment, while helping distinguish critical areas and HACCP control points.

COLOUR IS THE MOST EFFECTIVE WAY TO PREVENT CROSS CONTAMINATION

Mapa Spontex Professional recommends* the following colour coding system:

FOR CLINICAL,
TREATMENT AND
ISOLATION AREAS

YELLOW

RED

FOR SANITARY
APPLIANCES AND
WASHROOM AREAS

FOR GENERAL
AREAS EXCLUDING
WASHROOMS AND
CLINICAL AREAS

BLUE

GREEN

FOR GENERAL FOOD
AND DRINK AREAS

*Recommended colour system can change by business area and application as defined by BICS organisation

WHAT IS MICROFIBRE?

Cotton only repels dust and liquids, leaving surfaces damp and dirty

Standard fabric

VS

Microfibre

Microfibre catches and holds dust, leaving surfaces clean, dry and polished.

WHAT ARE THE USES FOR SPONTEX PROFESSIONAL MICROFIBRES?

Wet use	Dry use
Wipe • Absorb Degrease • Remove stains	Dust Remove fingerprint smudges

SPONTEX PROFESSIONAL MICROFIBRES REMOVE 99% OF BACTERIA

For optimal use of microfibre and to reduce the risk of cross-contamination during the cleaning process, Mapa Spontex Professional recommends that you follow the steps below:

Fold the microfibre in 4

Use both sides to clean the surface

Open the microfibre and fold it to clean with the unused sides

Use all **8 sides** and keep track of which sides have been used to avoid cross-contamination

HOW SHOULD THEY BE MAINTAINED?

60°C

- Spontex Professional microfibre have **excellent durability** and can be **machine washed up to 500 cycles at 60°C**
- Also washable in an **autoclave at 121°C**
- Do not wash with softeners

WIPING

Nonwoven - Microfibres

► MF Pro Recycled

RECYCLED MICROFIBRES, IDEAL FOR ALL TYPES OF SURFACES

Colour coded woven cloths preventing cross-contamination

- ⊕ **Removes 99% of bacteria and leaves no residue**
- Ultra-fast wiping and good absorption capacity (400%)**
- Excellent durability: up to 500 washing cycles at 60°C**
- Can be used with 96% Ethanol & 28g/l bleach**
- Can be used in an AutoClave at 121°C for 15 minutes**

DID YOU KNOW?

1 MF Pro Recycled
= 5 recycled bottles

TYPE OF PRODUCT

Colour coded microfibres

COMPOSITION

85% Polyamide, 15% Polyester
